

#EDUCATIONSUCCESS

Education Success Network - Building Better Learning Communities

THANK YOU...

for helping us reach students with the resources they need to succeed inside and outside the classroom! Exciting things are "taking root" this Spring for the 3,500 students we serve. We're thrilled to share these stories of new beginnings with you.

GROW

> Jason Cromeley, Norman Howard School '14 grad, is excelling in college and blazing a path toward his dream career in Fire & Emergency Services. "Never stop learning" is his message as he explores moving out of Rochester and his comfort zone.

BLOSSOM

> Young Women's College Prep's volleyball team is finishing an exciting first season! Expanded opportunities afforded by a new school building are igniting school spirit and enhancing learning. Parents love attending home games since YWCP joined the Education Success Network campus last fall.

EXPLORE

> Bio-plastics and engineering were lofty concepts until enthusiastic EnCompass learners spent afterschool hours engineering bubble machines, and designing products from household plastics. "Family Night" exhibits beckoned learners of all ages!

Families of K and 1st graders are excited to join Exploration Elementary Charter School for Science & Technology, Rochester's new STEM-focused elementary school, opening on Education Success Network's Lake Avenue Campus in August 2017. Here, young explorers can become tomorrow's innovators, collaborators, and problem-solvers. Learn more at ExplorationRochester.org

STRENGTHEN

> Helping students discover their own limitless potential means recognizing how challenges outside the classroom deeply impact them and their families. Since last fall we have reached 100 of our most vulnerable families with meal baskets for school vacation week.

The effects of Discovery Charter School's whole-child model are substantial. Parents share that the holistic support they receive has created exceptional experiences for their children and positive changes for their whole families.
